Change The Way You Work

Built to help grow your business... and run your business

Business is all about being mobile. Working wherever, whenever is quickly becoming the norm. At Intercity we want the world to be your office so your business can be mobile with the Internet, email and other corporate resources at your fingertips. Mobile broadband on your tablet and the latest smartphones running all your essential business apps.

We work in partnership with a wide range of suppliers meaning we will always find the right solution for your business needs.

We understand mobility is a journey

We offer solutions for all aspects of Enterprise Mobility Management (EMM), along with industry-leading mobile security at the device, app and data level.

Our EMM solutions let you easily enable mobile working across your workforce, secure your devices and manage your mobile workers' access to apps, data and business content.

Whether you're just starting on your mobile first journey or you're already mobilising critical business processes, apps and content, there's a solution designed to support your needs – all the way up to organisations with the highest security requirements.

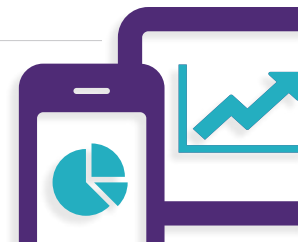

Stages of the mobility journey

Mobility Stage	Overview
Devices, Airtime, Os and data	Implementing basic hardware and commercial requirements to enable mobile working
Mobile Device Management/ Application Management	For organisations to introduce device-level control and management, we offer cross-platform, highly secure Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions
Mobile Workforce Enablement	For organisations ready to update existing processes we offer mobility tools to take advantage of a wide set of collaboration and third-party business apps, including mobilisation of Microsoft Office Apps, Cisco Jabber, Salesforce, and over 2,000 other business apps.
Mobile VAS	We offer tools that allow a business to fully embrace the benefits of mobile working by adding value & empowering employees to be more productive and better equipped to serve their customers through fully mobilised custom applications and processes, including a full platform for app security, design, development and deployment.

Our 4 step approach to mobilising your business

1. Understand your working environment
2. Map out different workers
3. Enable multi-location working
4. Deliver hardware, connectivity, application access & security
