

Get ultimate peace of mind - **secure your network, protect your organisation**

Touch Secure is a managed, cloud-based next-generation firewall service. It secures your network against external attack, protects your workloads hosted on cloud computing services, filters out malware and spam from your email and provides your mobile users with secure remote network access from any device and location.

Why choose Touch Secure?

Proven security technology

The security devices and applications that make up Touch Secure are mature, industry-hardened products, hosted in our multiple Tier 3 equivalent data centres and delivered over secure, resilient, private connectivity.

Flexible service options

We can deliver Touch Secure to supplement or replace some or all of your existing security measures, using a set of service options protecting Internet access, cloud computing, email and remote access.

Keeping current

We manage change and patching, with service platform databases that are remotely and securely updated by device and application manufacturers, ensuring that everything is kept up to date and equipped to protect against the very latest threats.

Multiple security layers

Touch Secure provides Internet-facing and internal firewalls, delivering two layers of Intrusion Prevention System supplied by different firewall manufacturers, providing a more robust defence and making the possibility of any breach remote.

Data sovereignty

The platform is based exclusively in mainland UK, so there is no possibility of customer data transiting or being stored in any location which is not under the jurisdiction of UK law.

Online monitoring

We provide you with service visibility, scaling from your network traffic, down to an individual user's behaviour, using our OnePortal system, which features an up-to-the-minute dashboard display of events displayed by quantity, type and severity.

Self-serve low-level tasks

We enable you to manage traffic shaping, session concurrency and white/blacklisting for email filtering, so you only need to contact us to make higher-level changes requiring specialist knowledge, such as adding and modifying firewall rules.

Round-the-clock service assurance

We monitor the Touch Secure platform and our customers' services at all times from our Intercity Secure Operations Centre, which is also responsible for managing critical public sector infrastructure.

Opex, not capex

We charge a monthly rental for Touch Secure, based on the service bandwidth and number of users, including the facility to flex both to match changing requirements on a monthly basis.

Our security track record

We boast more than 10 years' experience providing managed hosted and on-premise firewall services to hundreds of UK businesses and public sector organisations.

What **sets us apart** from our competitors?

| Our approach

Our approach brings together innovative ideas, honest advice and a genuine interest in your organisation's challenges.

| Proven client base

We count amongst our clients an enviable list of recognised commercial, government and third sector organisations, including the NHS and blue light services

| Our people

We design, implement, support, manage and host business critical infrastructures in the private sector and life-critical services delivered across the NHS.

| Strategic partners

Our partners reflect our standard of quality, scalability and price-performance, enabling us to deliver services cost-effectively and reliably, giving you peace of mind that your network security is safe in our hands.

About Intercity Technology

At Intercity Technology we believe in a people-first approach to define and launch technology solutions.

We have over 30 years' experience in delivering services that allow you to work together, work securely and work from anywhere on a global basis.

With a genuine passion for technology and the businesses we work with, we offer innovative technologies in cloud, enterprise mobility, collaboration, security and managed services.

Intercity is accredited by a number of professional organisations with a suite of accreditations which confirms and evidences our commitment to security, quality, service management and environmental management.
